Portfolio: portifoliomatheuslula.onrender.com
GitHub: github.com/matheusconaga

Professional Summary

Fullstack Developer with over 2 years of experience in web and mobile application development using React, TypeScript, Flutter, Python, and FastAPI. Experienced in building REST APIs, system integrations, and AI-driven automations, contributing to up to 40% reduction in manual tasks and a 20% to 30% increase in operational efficiency. Experienced with Docker, CI/CD, service-oriented architecture, JWT authentication, unit testing, and responsive interface development.

Professional Experience

RGM Tecnologia - Fullstack / Mobile Developer **Aug 2024 - Present | Parnaíba - PI, Brazil**

- Workflow automation using n8n and LLM integrations, reducing operational workload by up to 30% through process automation.
- Full-cycle development of web and mobile applications using React, Flutter, and React Native.
- Design and implementation of REST APIs with FastAPI and Node.js for communication between distributed services.
- System architecture based on Service-Oriented Architecture (SOA) integrating internal and external systems.
- Implementation of JWT authentication and administrative dashboards for internal operations control.
- Application of Clean Architecture, Clean Code, and SOLID principles for code standardization and maintainability.

Centro Espírita Caridade e Fé - Fullstack Freelancer **Oct 2025 - Dec 2025 | Brazil**

- Reduced operational rework by up to 40% through automation of asset management processes.
- Implemented an asset tracking system using QR Code for inventory identification and control.
- Developed an administrative dashboard for asset monitoring and centralized control.
- Built data import and export pipelines integrated with external services.

- Adopted reusable component-based architecture with a Design System for UI consistency.

ENEM Study Platform - Mobile / Frontend Developer Freelancer

Mar 2023 - Aug 2024 | Brazil

- Increased user engagement by ~30% through a gamified learning system.
- Improved educational performance rate from 50% to 80% via UX and learning flow optimization.
- Developed a Flutter mobile application with a performance and retention-oriented architecture.
- Implemented ranking system, progress tracking, and real-time feedback.
- Redesign of the user journey focused on UX optimization and engagement loop design.

Technical Skills

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Vite, Responsive Design

Mobile: Flutter, React Native, Dart

Backend & APIs: FastAPI, Node.js, Python, Next.js, REST APIs, JWT Authentication

UI/UX & Styling: Tailwind CSS, Styled Components, Material UI, Figma, Design Systems

Databases: PostgreSQL, MySQL, MongoDB, Firebase Firestore

DevOps & Cloud: Docker, Docker Compose, CI/CD, Firebase, Vercel, Render, Unit Testing, Integration Testing, Jenkins, GitHub Actions

Automation & AI: n8n, AI Integrations, Workflow Automation

Tools & Methodologies: Git, GitHub, Scrum, Kanban, MVC, MVVM, Clean Code, SOLID

Featured Projects

DocFlow AI - AI / RAG / Scalable Backend

- AI-powered intelligent document processing system based on RAG (Retrieval-Augmented Generation) architecture.
- System modeling with ingestion pipeline, indexing, and semantic document search.
- Implementation of vector embeddings and contextual retrieval for optimized semantic search.
- Integration of OCR, Gemini AI, and pgvector for structured data pipeline construction.
- FastAPI backend with PostgreSQL designed for asynchronous processing and horizontal scalability.
- CI/CD with Docker and GitHub Actions for automated deployment and continuous delivery.

GitHub: <https://github.com/matheusconaga/docflow-ai>

Asset Management System - Web / SPA / Automation

- Web system for asset management with administrative process automation.
- React SPA with reusable component-based architecture and separation of concerns.
- QR Code system for tracking physical assets.
- Administrative dashboard for centralized inventory and operations control.

- Serverless-first architecture using Firebase and Cloudinary, eliminating the need for a dedicated backend due to low initial load and concurrency.
- Design System applied for interface standardization and UI scalability.

GitHub: https://github.com/matheusconaga/projeto_patrimoniariorio

Mobile Social Network - Flutter / Fullstack / Reactivity

- Social mobile application with client-server architecture based on FastAPI.
- Decoupled frontend/backend architecture using Flutter for scalability and independent module evolution.
- Reactive state management using MobX for real-time state synchronization.
- Post feed with reactive updates and real-time interaction support.
- Integration with REST APIs and JWT authentication for session control and user security.
- Use of native device features (camera and geolocation) integrated into the content creation pipeline.

Education

- **Higher Education - Technologist in Systems Analysis and Development**
Federal Institute of Piauí (IFPI)
Completed: 2025
- **Technical Degree in Administration**
Federal Institute of Maranhão (IFMA)
Completed: 2021

Certifications

- Automation with N8N and AI Agents - Udemy (2026).
- Artificial Intelligence Training: From Zero to Advanced - Udemy (2026).
- User Experience - FIAP (2025).
- JavaScript and TypeScript - Udemy (2025).
- React Native - Udemy (2024).
- Flutter - Udemy (2024).

Languages

- English: Professional Working Proficiency (Technical reading and writing)
- Portuguese: Native speaker
